

Please REJECT the NAB's petition 04-160. Just who do those people think they are? It is my consitutional right to freedom of speech to be able to hear what medium of free speech I wish to listen to. XM radio provides valuable information more timely and accurately than any other medium. Why then would you want to stifle my being able to obtain this valuable information?

This is America after-all. Are the people so inefficient and ineffective about NAB's programming that they have to eliminate the competition any way they can?

Please reject the NAB's petition and protect my rights.
